TECEdrainpoint – engineered in Germany, made by TECE

Since 2005, company WET (Wuppertaler Edelstahltechnik), former BASIKA is part of world-wide TECE group. With BASIKA, TECE acquired more than 50 years of know-how and experience in Kitchen and shower drainage. All TECEdrainage products are engineered and tested in Emsdetten, Germany.

Apart of that, TECEdrainpoint specifically tested according to Standard DIN EN 1253-1: 2015-01 by TÜV Rheinland, test report 60229462-001 from 07.03.2019

Besides, TECEdrainpoint is part of Seal System composite seal: independently tested

Ensure safe sealing for the shower? No more time-consuming research! With Seal System, plumbers and tilers have tested safety when connecting composite seals for the bathroom. Whether for shower channels, shower profiles and point drains: you can rely on the composite seal with the "Seal System" seal.

And with the Seal System sealing set for wall ducts, you get full security for sealing interiors. TECE has developed a sealing set that ensures the fitting connection complies with standards and allows the

installation to proceed without damage to the tiles. The sealing set consists of a building protection plug, sealing sleeve and sealing collar. The Seal System from TECE simply and clearly defines the interface between tiler and plumber and guarantees a secure sealing - tested and compliant with standards. Rely on the sealing elements with the Seal System quality seal. For more reliability in sealing your shower.

Being a global player, TECE produces TECEdrainpoint and its components under strictest supervision in our own factory TCS in China.
